

AVALANCHE

ice melter
with CMA

AVALANCHE™ ice melter with CMA

FAST ACTION

Avalanche™ combines the most effective deicing blend, creating the desired reaction to initiate deicing and meltdown. Avalanche™ breaks the bond between the ice and the surface area. As Avalanche™ goes to work, its time-released formula stays on the surface area longer, helping to control the freeze/thaw cycle.

HEALTH & SAFETY

Avalanche™ is safe to handle without protective clothing. It does not dry out or irritate the skin.

NON-TRACKING

When used properly, Avalanche™ will remain where applied and will not cause any unsightly tracking or residue problems.

EASILY DISPERSED & EXTENDED SHELF LIFE

Avalanche™ is specially formulated with an anti-caking agent to remain free-flowing for easy dispersion.

VISUALLY MEASURED

Not only will you see the quick action of Avalanche™, specially coated with "BLUE MELT", going to work on the snow and ice, this product will allow the precise spreading to ensure cost-effective dispersion.

ENVIRONMENTALLY FORMULATED

Nature's own ingredients combine for just the right formula. Unlike some deicers, Avalanche™ works to preserve "vegetation and plant life" when used as directed. With Avalanche™, there is no slimy residue being tracked in, making clean up virtually non-existent.

TRACTION CONTROL

Avalanche™ goes after the ice and snow clearing the way to safety. This specially formulated product contains "Dolomite" for added traction control; further enhancing performance.

CORROSION PROTECTION

Specially enhanced with CMA (Calcium Magnesium Acetate), our formula guards against concrete and corrosion damage by forming a protective coating on the surface.
